Daffodil International University
Department of Computer Science and Engineering
Course Code: CSE499 **Title:** FYDP (Title Defense)

Proposal Approval Form

I. 1st Member information			
Student ID:		**Student Name:**	
II. 2nd Member information [***if there is any. Otherwise, skip this]***			
Student ID:		**Student Name:**	
Semester:		**Date:**	
III. Proposed Title:			
IV. Updated Title (If there is any update**):**			

This is the approval for the Final Year Design Project (FYDP) proposal and title submitted by the above-mentioned student who is from the Department of CSE under my supervision. Upon thorough review and evaluation, it is my professional opinion that the **proposed project title** ***[mentioned in Sec III and IV]*** is both relevant and aligned with the academic goals and standards of our department. I (Supervisor) have endorsed the proposed proposal and title. Under our department's guidelines, the student has fulfilled all the necessary prerequisites and will attach this Proposal Approval Form to their FYDP Title Phase Evaluation Report.

V. Detailed Proposal

1. Objective

Objective: [Describe the main objective of your project, what problem you are solving, and how you plan to solve it.]

2. Motivation

Motivation: [Describe the motivation behind your project. Why is it important? What issues or gaps in current research does your project address?]

3. Background Study

Background Study: [Summarize the literature review. Discuss previous works related to your project topic, what is already known, and what gaps your research aims to fill.]

4. Gap Analysis

Gap Analysis: [Describe the gaps in existing research or practical solutions. How does your project aim to fill these gaps? What specific problem will your project address?]

5. Methodology

[Describe your approach, including the tools and techniques you will use, such as algorithms, models, or technologies. Provide an overview of how you will execute your project.]

- **Techniques/Tools**: [List and describe the techniques or tools you will use (e.g., ML algorithms, data collection methods, software tools).]
- **Data Collection**: [Explain how you will collect data for your project. Where will you get your data from? How will it be processed?]
- **Data Analysis**: [Describe how you will analyze the collected data. What performance metrics will you use? How will you evaluate your model or solution?]

- **Workflow Diagram (optional):** [Optional: Include a diagram showing the steps of your methodology.]

6. Expected Outcomes

Expected Outcomes: [Describe the outcomes you expect from your project. What will your tool, system, or research contribute to the field? What practical results do you aim to achieve?]

7. Conclusion

Conclusion: [Summarize your research and restate the importance of your project. What makes your project relevant and significant?]
